

UnicornHygienics

Manufacturer of washroom solutions and hygiene products

UNICORN HYGIENICS

ABOUT US

Unicorn Hygienics is a global manufacturer and supplier of high-quality washroom products and hygiene solutions, designed specifically to support washroom service companies and the customers they serve. With over 30 years of industry experience, we understand the operational demands of the washroom sector and the importance of reliable, efficient solutions.

All our products are proudly manufactured in-house at our state-of-the-art facility in Northern Ireland, where we operate to strict ISO standards. This gives us complete control over quality, consistency, and performance - ensuring our customers receive dependable products they can trust. Our large stock-holding capacity enables us to respond quickly to demand, minimise downtime, and maintain consistent availability, even during peak periods.

We offer a comprehensive range of end-to-end washroom hygiene solutions, including washroom vending machines and consumables, air freshener systems, sanitary and nappy disposal bins, WC and urinal hygiene systems, fragranced cleaners and deodorisers, and Period Dignity solutions. Every product is engineered to make washroom servicing quicker, easier, and more efficient - helping reduce maintenance time while enhancing the end-user experience.

At Unicorn Hygienics, our ethos is built on quality, trust, and long-term partnership. We believe in working collaboratively with our customers, offering tailored advice, technical support, and personalised solutions. Our multilingual team supports a diverse global customer base, ensuring responsive service wherever it's needed.

More than just a manufacturer, we are a committed partner to washroom service providers.

WHY CHOOSE UNICORN HYGIENICS

30+
YEARS

Over 30 Years of Trusted Expertise

With over three decades of experience, Unicorn Hygienics is a reliable partner for washroom service companies worldwide, providing high-quality solutions that simplify maintenance and enhance the user experience.

Stock Available Ready To Ship

Proudly made in Northern Ireland, our UK-made hygiene products reach customers worldwide with ease. Northern Ireland Protocol shipping advantages mean fewer delays, lower tariffs, and a hassle-free international supply chain.

Committed to Quality and Innovation

We focus on delivering durable, user-friendly products by combining rigorous quality checks with continuous innovation in design, ensuring the highest standards in every item we produce.

Simplified Servicing for Maximum Efficiency

Our products are engineered to streamline servicing, reducing maintenance time and helping businesses cut costs with easy-to-service, efficient designs.

Customisable, Customer-Focused Solutions

Every solution is tailored to meet specific needs, from custom dispensers to period dignity products, allowing you to offer practical, visually appealing options with expert support at every step.

Sustainable and Cost-Effective

With eco-conscious manufacturing and competitively priced products, we deliver sustainable, high-value solutions that help meet your business goals while reducing your environmental footprint..

AIR FRESHENERS

AIR FRESHENERS

PURESS

The Puresse Air Care Dispenser delivers consistent, long-lasting fragrance to any washroom or public space, ensuring a fresh and welcoming environment. Designed specifically for the washroom services industry, this sleek, wall-mounted unit is fully programmable, allowing you to set spray intervals from 30 to 90 days to align with existing service schedules.

Easy to install with a built-in spirit level and equipped with tamper-resistant features, the dispenser provides hassle-free maintenance and precise fragrance delivery.

Compatible with a wide range of refill scents and sizes, it suits both small washrooms and busy public areas, helping facilities maintain high hygiene standards while reducing service visits and operational costs.

FEATURES:

- A choice of 30, 45, 60 or 90 day service intervals
- Fully programmable to optimise usage during working hours
- Customisable with company logo
- Wide range of fragrances available
- Built in spirit level to ensure accurate installation
- Wires hidden to prevent tampering
- Keyed or un-keyed lock
- Default settings or custom programming
- Countdown display until next spray

CLEANERS & DEODORISERS

SANAIR

The Sanair 610ml Dispenser is a high-capacity, dual-action unit designed to automatically deliver a measured dose of cleaner and deodoriser fluid into urinals or WCs, while also providing an intense air freshening function.

The built-in wick-based scent diffuser, located in the convection chamber, ensures high fragrance intensity throughout the space.

Ideal for hotter climates and high-traffic locations, every flush produces a concentrated, fragrant foam that reduces surface stains, eliminates germs, and prevents bacteria build-up in urinal and WC porcelain micro-pores.

An additional feature, is its dual-feed design that allows a single unit to service two urinals at once, cutting installation time and refill costs.

FEATURES:

- Non aerosol air freshener system
- Open systems to allow air flow
- Programmable for 30 or 60 days
- Wide range of fragrances available
- Bio refills available
- Customisable with company logo

HOW IT WORKS

Specially formulated fluid dispenses from the bottle and flows down the chevron channel.

Some of the fluid is absorbed by the wick.

Specially formulated fluid dispenses from the bottle and flows down the chevron channel. Some of the fluid is absorbed by the wick. The remaining fluid collects in the well, when it reaches the spillway level, it flows down through the connected pipes and into the WC/Urinal. Air passes through the convection chamber and evaporates fluid from the wick material, providing a continuous fragrance in the air.

The remaining fluid collects in the well, when it reaches the spillway level, it flows down through the connected pipes and into the WC/Urinal.

Every flush produces a concentrated and fragrant foam, which reduces germs and surface stains and therefore eliminating the bad smell at source.

The formulations also help dissolve uric acid, which clog and block internal pipes and pipelines. Helping maintain and enhance pipe lifespan.

CLEANERS & DEODORISERS

PURESAN

The Puresan 310ml Dispenser is a compact, closed-system unit designed to automatically deliver a measured dose of cleaner and deodoriser fluid directly into a urinal or WC.

By dosing at regular intervals, it effectively combats the build-up of bacteria and germs that accumulate on washroom surfaces - helping your service teams maintain higher hygiene standards with less effort.

Its discreet, wall-mounted design can even be installed below the cistern, giving you greater flexibility where wall space is tight. This makes it ideal for smaller washrooms or sites where aesthetics matter.

FEATURES:

- Programmable for 30 or 60 days
- Wide range of fragrances available
- Bio refills available
- Customisable with company logo
- Can be installed up to 0.5 metre below a cistern
- Closed system

ODOURCLEAN

The OdourClean Dispenser is a simple, gravity-fed unit designed to continuously deliver cleaning and deodorising fluid into urinals or WCs, tackling odours at the source while reducing bacteria build-up. Every drip helps eliminate offensive smells and minimises surface stains, maintaining a fresher, more hygienic washroom environment with minimal effort.

With no motors or batteries, the OdourClean is a low-maintenance, cost-effective solution - ideal for budget-sensitive contracts or sites with limited servicing access. Its reliable, automatic operation ensures washrooms stay clean and welcoming between service visits, providing washroom service companies with an efficient, fuss-free option for maintaining washrooms.

FEATURES:

- Gravity operated
- 25L fragrance refill
- Installation parts included
- Customisable with company logo

REFILLABLE
BOTTLES

1 YEAR
WARRANTY

HOW IT WORKS

The bottle is refilled as required, mixing a dose of a concentrated formulation and water. The ratio of the dilution will depend on the intensity required. The bottle is then placed inside the dispenser, depressing the needle in the cap allowing the fluid to flow into the reservoir up to the level of the bottle cap. The bottle is then placed inside the dispenser, depressing the needle in the cap allowing the fluid to flow into the reservoir up to the level of the bottle cap.

The wick will absorb the fluid, transferring it from the reservoir to the pipe. The pipe is either connected to the cistern or directly into the urinal/WC.

The flow is regulated by the J-pipe allowing the user to slow down or speed up the flow, adjusting the service intervals as needed.

The concentrate fluid is fragranced to offer a clean and fresh washroom and has a cleaner to reduce the growth of bacteria.

FRAGRANCES

FRAGRANCES

Unicorn Hygienics manufacture a wide range of fragrances across our Air Freshener and Cleaner & Deodoriser ranges. We have developed our scents based on feedback from customers in over 30 countries. Having created a fragrance range that caters to all markets, Unicorn Hygienics can guarantee a scent that will be both effective and pleasant in any washroom or public area across the globe.

Malodour Counteractant Technology

Our fragrances contain a malodour counteractant innovative technology. Rather than masking odours they neutralise the active malodour molecules and replaces them with the desired fragrance. Reduces at least 70% of the malodour perception.

URINAL TREATMENT & URINAL MATS

URINAL TREATMENT & URINAL MATS

Powersolve

Powersolve is a fast-acting WC and urinal treatment designed to break down organic waste quickly and effectively in urinals, WCs, and shower cubicles.

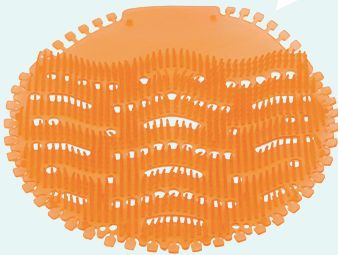

Its highly concentrated cleaning agents help prevent blockages and remove unpleasant odours, leaving facilities hygienic and fresh.

100% biodegradable, Powersolve sachets dissolve instantly upon contact with water, removing build-up of waste materials after just one treatment.

It's an ideal solution for washroom service companies and facilities managers looking to reduce maintenance, improve hygiene, and ensure a cleaner washroom environment for end users.

FEATURES:

- Fast acting – results after just one treatment
- Breaks down organic waste and build up
- Helps to remove odours
- 100% biodegradable

Aroma Mat

The Aroma Mat is a high-performance urinal screen deodoriser system designed to keep urinals hygienic and fresh for up to 30 days. Blending carefully engineered splashback prevention with long-lasting fragrance, it reduces odours at the source and helps maintain a cleaner, more pleasant washroom environment.

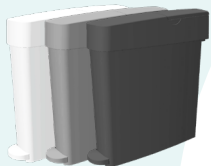

Its flexible design fits any standard urinal, prevents blockages and releases a consistent fragrance throughout the month. Available in a choice of appealing scents, the Aroma Mat is the ideal solution for busy washrooms where hygiene and freshness are essential.

For washroom service companies, the Aroma Mat offers a simple, cost-effective way to enhance service quality while reducing maintenance calls. For end users, it delivers a visibly cleaner urinal, a fresher smell, and a more hygienic experience.

FEATURES:

- Lasts 30 days
- Variety of fragrances available
- Easy reminder system
- Fits all urinals
- Odour control
- Anti - splashback

SANICARE SANITARY BIN

The Sanicare Sanitary Bin is a sleek, hygienic, and sustainable solution for sanitary waste disposal, designed to meet the needs of modern washroom environments. Combining advanced antimicrobial technology with a slim, user-friendly design, that blends seamlessly into any cubicle space.

Its built-in antimicrobial trap inhibits bacteria growth by up to 99%, reducing the risk of cross-contamination and enhancing overall cleanliness for users.

Ideal for both high-traffic public facilities and smaller private settings, the bin is made from recyclable materials and offers flexible installation with a front-facing trap that suits left- or right-side placement.

For washroom service teams, features like the quick-release lid, integrated handle, and optional carrying bracket make servicing fast, safe, and efficient - helping reduce turnaround time and improve hygiene standards with minimal effort.

FEATURES:

- Produced with antimicrobial technology to help reduce bacteria by up to 99%
- The Sanicare range is produced from recyclable materials
- Charcoal Grey option made from 100% recycled material
- Slim design
- Front facing trap
- Quick and easy to service
- Integrated handle
- Suitable for use with our antimicrobial sanitary liners
- Smooth interior finish
- Additional carrying bracket available

DISPOSAL MODULAR BIN

The Modular Disposal Bin is a highly durable, fire-retardant waste disposal solution designed for busy environments.

Available in both 17L and 64L capacities, it's ideal for a wide range of applications - from washrooms and healthcare settings to public spaces and office facilities.

Manufactured from robust 1 mm Zintec steel and finished with a multi-stage degreasing and washing process, the Modular Bin offers superior durability and long-term protection against corrosion.

Its removable body makes cleaning quick and simple, helping washroom service companies reduce servicing times and maintain high hygiene standards.

A built-in well at the base prevents liquid leakage onto floors, ensuring a cleaner and safer environment for users.

Combined with pedal operation and base plate support, the Modular Bin provides a hands-free, stable and hygienic waste disposal option for high-traffic areas.

With a wide range of body and lid colour choices, and optional personalisation such as vinyl branding and castor kits, the

Modular Bin allows businesses to tailor bins to their own branding, improving consistency and enhancing their professional image across multiple sites.

STANDARD FEATURES:

- Produced from high grade zintec steel
- Pedal operated
- Base plate support

OPTIONAL FEATURES:

- Vinyl personalisation
- Castor kit
- Silent closing

FINISHES:

Standard white finish. Other colours available upon request.

ANTI-MICROBIAL SANITARY BIN LINERS

Our Anti-Microbial Sanitary Bin Liners provide a hygienic and convenient solution for sanitary waste disposal. Featuring Biomaster® anti-microbial protection, they reduce bacterial levels by up to 99.99%. Each liner also includes a fresh floral fragrance to neutralize odours, eliminating the need for additional chemicals.

This combination not only ensures a cleaner, safer environment but also improves site servicing efficiency, reducing replacement and cleaning times. Made from 100% recyclable materials, these liners offer an eco-friendly solution for hygiene-conscious environments.

PRODUCT INFORMATION:

- White Anti-Microbial Sanitary Bin Liners
- Produced with Biomaster® Product Protection which reduces the growth of bacteria by up to 99.99%
- Fresh and clean floral scent helps reduce odours
- Hygienic solution for the disposal of sanitary waste products

SPECIFICATION:

- Dimensions: 615mm x 590mm
- 100% recyclable
- 25 liners per roll
- Box quantity: 10 rolls per box

VENDING MACHINES

VENDING MACHINES

EASIVEND CONTACTLESS

The Easivend Contactless is a fully automatic, wall-mounted vending machine designed to deliver convenient, hygienic, and efficient access to essential washroom consumables. With contactless operation and a clear digital display, it provides a premium user experience while simplifying management for service providers and facilities teams.

For washroom service companies and facilities managers, the Easivend offers a reliable, mains-powered solution with no batteries to maintain, minimising service time and maximising uptime.

Its programmable interface allows for easy pricing and product updates, while the digital display shows live stock levels and service alerts - streamlining refills and reducing unnecessary visits. The machine can also be configured for a wide range of product types, including nappies and period care items, making it highly adaptable across different client sites.

With up to nine product choices and optional custom branding, the Easivend ensures a professional, inclusive, and dignified washroom offering.

FEATURES:

- Cashless vending
- Handle pricing and stock management remotely
- Access real time data
- Quicker customer transactions
- Secured vending - reduced risk of theft
- Improved customer experience
- Maximise vending sales

AUTOVEND

The AutoVend V2 is a compact, coin- or token-operated vending machine designed to deliver boxed washroom consumables in a simple, secure, and cost-effective way. Whether installed in small or high-traffic washrooms, its slim, durable design makes it a reliable solution for facilities managers looking to streamline product distribution while maintaining a clean and professional appearance.

Our most recent version is designed for even greater service efficiency, featuring fewer internal components, making it lighter, quicker and easier to install. Installation teams can mount the unit with minimal adjustment.

Constructed from robust steel for long-lasting performance and resistance to tampering, the AutoVend includes dual-column dispensing for offering two boxed product types per machine - ideal for locations needing both variety and volume. Its battery-powered, self-contained operation requires no electrical wiring, making it quick to install and cost-effective to maintain across multiple sites.

For end users, the AutoVend ensures hygienic access to sealed boxed products, including Unicorn Hygienics' Selenei organic period care range, and is compatible with a wide variety of consumables such as pads, tampons, and incontinence products.

FEATURES:

- Slim design
- 2 product choices per machine
- Configurable for different currencies
- Battery powered - no mains wiring
- Can be customised to incorporate company logo
- Refunds money when no stock is present

UNICORN HYGIENICS CLEANROOM FACILITIES

Unicorn Hygienics offer an extensive range of branded vending consumables that can be used with our vending machines.

Products are hygienically packed in our state of the art cleanroom facility, eliminating the risk of product tampering during the supply process.

Our wide selection of consumables have been selected based on customer requirements and we are responsive to customer feedback and industry trends. We regularly introduce new products to our ranges including our latest addition Selenei Organic, a range of period products made from 100% organic cotton.

CORPORATE RESPONSIBILITY

Sustainability in Action: Our Commitment to Corporate Responsibility & Carbon Neutrality

At Unicorn Hygienics, we are committed to operating a socially and environmentally responsible business. We have placed significant investment into improving our manufacturing and production processes. We believe that the small changes we introduce to our businesses can make a big difference.

REDUCING OUR CARBON FOOTPRINT:

- PAS 2060 Carbon Neutral Verified - Our factory and headquarters are carbon neutral, with a target of net-zero by 2027.
- ISO-Certified Manufacturing - All products are made in our Carbon Neutral facility to ISO 14001 (Environmental) and ISO 9001 (Quality) standards.
- Renewable Energy & Efficiency - A significant portion of our electricity comes from renewable sources. Energy-saving lighting, efficient heating, and KPI monitoring to reduce our footprint.
- Recycling & Waste Management - On-site PVC regrind and recycling, recyclable packaging, and the use of recycled raw materials minimise waste and emissions.

Responsible Supply Chain

- We partner with suppliers who share our sustainability values and maintain substantial stock at our factory to reduce frequent shipments - lowering transport emissions and packaging waste.

Innovation & Eco-Friendly Products

- Our Selenei organic period product range offers eco-friendly, organic solutions for customers while supporting your commitment to sustainability.

Your Sustainable Supply Partner

- Flexi-Tile provides high-quality products, responsible practices, and measurable environmental progress. Together, we can build a greener, more sustainable future.
